Volume 292 **CONTENTS** 10 June 1995

Passive scalar dispersion and mixing in a turbulent jet. CHENNING TONG and Z. WARHAFT *page* 1

Gravity current flow over obstacles. G. F. LANE-SERFF, L. M. BEAL and T. D. HADFIELD 39

Gravity-driven flows in porous layers. HERBERT E. HUPPERT and ANDREW W. WOODS 55

The motion of long bubbles in polygonal capillaries. Part 1. Thin films. HARRIS WONG, C. J. RADKE and S. MORRIS 71

The motion of long bubbles in polygonal capillaries. Part 2. Drag, fluid pressure and fluid flow. HARRIS WONG, C. J. RADKE and S. MORRIS 95

A rapid-pressure covariance representation consistent with the Taylor–Proudman theorem materially frame indifferent in the two-dimensional limit. J. R. RISTORCELLI, J. L. LUMLEY and R. ABID 111

Stationary perturbations of Couette–Poiseuille flow: the flow development in long cavities and channels. JENNIFER R. STOCKER and PETER W. DUCK 153

Adjoint systems and their role in the receptivity problem for boundary layers. D. C. HILL 183

An experimental investigation of Taylor vortex flow between conical cylinders. MANFRED WIMMER 205

On penetrative convection at low Péclet number. JOHN R. LISTER 229

Effects of islands upon dispersion in rivers. RONALD SMITH 249

Influence of incidence angle on sound generation by airfoils interacting with high-frequency gusts. MATTHEW R. MYERS and E. J. KERSCHEN 271

Stability of two-dimensional convection in a fluid-saturated porous medium. M. DE LA TORRE JUÁREZ and F. H. BUSSE 305

The rise velocity and shape of bubbles in pure water at high Reynolds number. P. C. DUINEVELD 325

Stratified circular Couette flow: instability and flow regimes. B. M. BOUBNOV, E. B. GLEDZER and E. J. HOPFINGER 333

Pressure-driven flow of a thin viscous sheet. B. W. VAN DE FLIERT, P. D. HOWELL and J. R. OCKENDEN 359

Viscous effects on fully coupled resonant-triad interactions: an analytical approach. XUESONG WU 377

INDEX TO VOLUME 292 408

SCHEDULE OF INTERNATIONAL CONFERENCES ON FLUID MECHANICS 410
